

Explore your fitness for science teaching!

TE 362, FIELD EXPERIENCE IN SCIENCE TEACHING

This 2-unit course provides you the opportunity to explore a career in science teaching by visiting classrooms of exemplary science teachers, learning from an award-winning science teacher, and experiencing the rewards of cultivating a passion for learning science. No commitment to becoming a teacher required. This course allows you to “dip your toe in the water” of teaching to see whether this career might be a good option for you.

Chemistry and Physics Majors:

Enroll in TE 362 and **Earn** elective units in your major! Bio majors, check with your advisor.

What is the current state of science teaching? Science teachers...

- share their passion for science with others;
- positively influence students' lives;
- are in very high demand; and
- start their jobs earning about \$50,000 per year for 10 months of teaching (2 months off) and have excellent health and retirement benefits.
