

# RECRUITING INTERNS

There are many different avenues for reaching out to students with your internship opportunities.

- Advertise openings on Aztec Career Connection, Career Service's free online job and internship listing tool. The first step is to identify if you are offering a paid or unpaid opportunity in order to get more information on posting internships.
- Send listings to SDSU's Campus Internship Coordinator for distribution to targeted faculty and student groups.
- Come to Career Fairs held on campus.
- Advertise in the SDSU student newspaper, The Daily Aztec.
- Participate as a presenter at a Career Services event.
- Network with people from different academic departments.
- Make presentations at student cultural organizations or Associated Students groups.

In order to give all students an opportunity to view postings, we encourage employers to post their internship positions on Aztec Career Connection.
